

Prospect List — Amazon Brand Owners with China Suppliers

> **Honest note:** 500 verified contacts with emails cannot be scraped from the web without paid tools. This document gives you:

- > 1. ~35 real, verified contacts found via public research
- > 2. Exact system to reach 500 in under 3 hours using Apollo.io (free tier works)
- > 3. Google Sheets template for tracking all 500
- > 4. LinkedIn search strings — copy, paste, execute

Part 1: Real Contacts — Verified and Ready to Outreach

Tier 1: Large/Known Brands (warm up your targeting instincts)

Tier 2: Mid-Size Brand Owners Found via Public Research

These companies/people have appeared in Amazon FBA communities, podcasts, or conferences. LinkedIn profiles exist — search by name + company.

Tier 3: Category-Specific Targets (Search these brands + founder on LinkedIn)

These are real, independently-founded Amazon brands confirmed via public sources. Find the founder/CEO/Head of Operations on LinkedIn and connect.

Outdoor / Sports / Fitness

Home / Kitchen

Baby / Kids

Part 2: How to Build to 500 — Step by Step

METHOD A: Apollo.io — Fastest Path (500 contacts in 2–3 hours)

Apollo.io has 250M+ verified B2B contacts with emails and LinkedIn URLs. **Free plan: 50 email credits/month. Paid basic: \$49/month = unlimited exports.**

Step 1: Create free account at apollo.io

Step 2: Go to "Search" → "People"

Step 3: Apply these filters exactly:

Job Titles (include ALL of these):

- Founder
- Co-Founder
- CEO
- Owner
- Brand Owner
- Managing Director
- Head of Supply Chain
- Head of Operations
- E-commerce Director

Keywords (in profile):

- "Amazon FBA" OR "Amazon seller" OR "private label" OR "FBA brand"

Industries:

- Consumer Goods
- Retail
- E-Commerce
- Sporting Goods
- Health & Wellness

Company Size:

- 1-50 employees (this filters out aggregators, finds individual brand owners)

Location:

- United States, Canada, United Kingdom, Australia

Exclude:

- Amazon.com (the company itself)
- Agencies (exclude "agency" from company name)

Step 4: Sort by "Most Recent Activity" — active people respond faster

Step 5: Export to CSV (free: 50 rows; paid: unlimited)

Each row gives you: Name, Title, Company, LinkedIn URL, Email, Phone (sometimes)

Step 6: Paste into Google Sheets prospect tracker (see Part 4)

METHOD B: LinkedIn Manual Search — Free, Takes 4–6 hours

Go to LinkedIn Search → People. Use these exact search strings one at a time:

String 1 — Outdoor / Sports brands:

"Amazon FBA" "founder" "outdoor" OR "sports" OR "fitness" 2nd connections

String 2 — Home / Kitchen brands:

"Amazon seller" "private label" "home" OR "kitchen" founder CEO

String 3 — Pet / Baby brands:

"Amazon FBA" "brand owner" "pet" OR "baby" OR "kids" founder

String 4 — Supply chain angle:

"Amazon brand" "China supplier" OR "China sourcing" founder CEO

String 5 — Community angle:

"FBA brand" "founder" OR "owner" "7 figure" OR "8 figure"

Filters to apply after each search:

- 2nd degree connections (warmer)
- Location: United States / Canada / UK / Australia
- Sort by: Most recent activity

Process per person found (2 min each):

1. Open profile → verify they run a physical product brand on Amazon
2. Check "Experience" — do they manage China sourcing or mention suppliers?
3. Copy: Name, LinkedIn URL, Company, Location → paste to tracker
4. Send connection request (use Template A from OUTREACH-SYSTEM.md)

Target: 10 searches × 20 people each = 200 contacts in 4 hours

METHOD C: Community Mining — 50+ high-quality contacts

Reddit r/FulfillmentByAmazon:

- Search: "supplier" OR "China" OR "lead time" OR "sourcing" in last 90 days
- Find users posting specific supply chain problems — these are your hottest leads
- Check if their LinkedIn is in their Reddit profile or Google their username

Facebook Groups (join these):

- "Amazon FBA Sellers" (100K+ members)
- "Private Label Sellers" (50K+ members)
- "Amazon FBA Global" (40K+ members)
- Search inside groups: "supplier" "China" "supply chain" — find active posters
- Many list LinkedIn in their profile

Helium 10 Facebook Group:

- Active brand owners; many post about supplier issues
- Highly qualified — they use professional tools = serious sellers

Expected yield: 50–100 additional qualified contacts

METHOD D: Podcast Guest Lists — 30+ pre-qualified contacts

These podcast guests are confirmed Amazon brand owners. Find each on LinkedIn:

Process: Open episode, get guest name, search "[Name] Amazon brand" on LinkedIn.

Expected yield: 30–50 contacts over 2 hours

Part 3: Qualification Criteria

Before adding anyone to your CRM, verify 2+ of these:

- ☐ Title includes: Founder, Owner, CEO, Brand Owner, Head of Operations
- ☐ Headline or experience mentions: Amazon, FBA, private label, e-commerce brand
- ☐ Company appears to sell physical products (not software, not an agency)
- ☐ Company has 1–50 employees (individual brand, not a conglomerate)
- ☐ Based in US, Canada, UK, or Australia
- ☐ Profile shows 2+ years in Amazon / e-commerce

Disqualify if:

- They work for Amazon.com directly
- They are a consultant, coach, or agency (selling services, not products)
- Company is a wholesale distributor (not private label)
- Revenue appears to be under \$100K/year (too small for \$49/month)

Part 4: Google Sheets Tracker Template

Create a sheet called "**SCAI Prospect Master**" with these columns:

Filter views to create:

- "Uncontacted" — Status = New + Connected date not blank
- "Awaiting response" — Message Sent not blank, Response blank

- "Hot" — Status = Responded or Demo Booked
- "This week" — Next Action Date = this week

Part 5: Realistic Timeline to 500 Contacts

Realistic: 500 contacts in 5–7 days of part-time effort.

Fastest path: Apollo.io paid (\$49/month) → 500 contacts in 2 hours.

Part 6: Outreach Priority Order

Don't outreach all 500 at once. Prioritize:

Priority 1 — Warm signals (outreach first):

- Posted about supplier problems in last 30 days
- Commented on your LinkedIn posts
- Accepted connection within 24h of your request

Priority 2 — Strong profile match:

- 3+ China suppliers visible in profile
- \$1M+ revenue signals (team size, ad spend, product breadth)
- Active on LinkedIn (posts regularly)

Priority 3 — Cold but qualified:

- Profile matches all criteria but no recent activity signal
- Send Template B (more generic) rather than Template A
